

## Maintenance Tips

### Blade Cleaning:

Use the isopropyl alcohol prep pads provided with your machine to clean your blade prior to its first use to remove oil from the blade. You should also clean the blade daily to remove debris from the blade. Each standard blade pack (Cat# - 2005A) and Maintenance Kit (Cat# - 2001A) will come with a box of isopropyl alcohol prep pads.

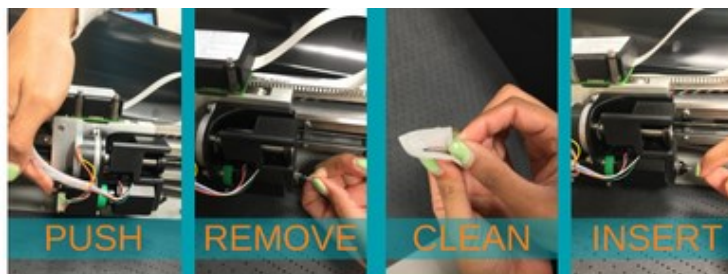

#### Prior to Install

Clean your blade with an isopropyl alcohol prep pad

#### For Best Results

Remove and clean your blade daily with an isopropyl alcohol prep pad

### Cutout Maker Paper:

We highly recommend that you use Tru-Ray Sulphite Heavyweight construction paper. Tru-Ray Sulphite Heavyweight Paper is made with long, strong 100% sulphite fibers. This heavyweight paper is tough enough to take scoring, folding, cutting, and curling without cracking or tearing. Using low quality construction paper can lead to poor cut quality.

You can purchase Cutout Maker approved paper direct from your VariQuest dealer or you can check major retailers such as Amazon, Dick Blick or Office Depot/Office Max.
